Education

2023–Present **B.S. in Computer Engineering**, *Amirkabir University of Technology*, Tehran, Iran
GPA (without rounding): 3.52/4.0

Achievements

- **Silver Medalist, Iranian National Olympiad in Informatics (INOI)** — Ranked 19th in the 32nd INOI held in the summer of 2022, among nearly 50 medalists selected via several rounds of highly competitive entrance exams for highschool students to join the INOI summer camp, and have a chance of being in Iran's national team for the IOI – **Medalists' list**
- **Silver Medal & 8th Place, ICPC Asia Regional Contest – Tehran Site (2023)** — competed against 80+ teams, from top universities across the country. This is the official selection round for the ICPC world finals – **Official scoreboard**
- Consistently achieved **top rankings** in multiple **onsite** ICPC selection contests at leading Iranian universities, including Amirkabir University of Technology, University of Tehran, etc.
- **2nd Place, EMIT Blockchain Event** — placed second in a Solidity-based CTF contest focused on smart contract security and blockchain development, organized by the Computer Engineering Students' Scientific Chapter at Amirkabir University of Technology (Tehran Polytechnic) – **Event's poster**

Work Experience

2023–Present **Blockchain Software Engineer, part-time**, *BitPin Cryptocurrency Exchange*, Tehran, Iran
Started as a junior software engineer, to develop and maintain cryptocurrency payment systems for the exchange. Promoted to a mid-level software engineer in less than a year of part-time work.

Skills

Academic Probability and Statistics, Calculus, Combinatorics, Linear Algebra, Graph theory, Theory of Computation, Computer Systems

Programming Python, C++, SQL, Solidity, Verilog, Latex

Technical Tools Git, Docker, PostgreSQL

Notable Academic Performance

I'm proud to say that I've earned **near perfect scores** in the following courses:

- Fundamentals of Computer Programming
- Math I
- Math II
- Data Structures and Algorithms
- Engineering Statistics
- Theory of Machines and Languages
- Principles of Database Design
- Software Engineering I

It is worth mentioning that my participation in the INOI and ICPC contests has left me with a passion for problem solving, and a strong foundation of mathematics in general, especially in fields like Graph Theory, Combinatorics, Number Theory, and Probability and Statistics as well as CS related fields like Datastructures and Algorithms, Theory of Computation etc. This, has led me to believe that I have a strong passion for academic research, and would like to be a part of a research project, and gain some research experience.
